Retraction

This article has been retracted by the publisher for the following reasons:

Retraction Notice: Unauthorized Use of Registered Trademark

We regret to inform our readers that the article titled **Effect of oral liposomal (sucrosomial) iron versus intravenous iron for treatment of iron deficiency anaemia in chronic kidney disease patients: A randomized trial** published on **July-September 2020;3(3):59-64** has been retracted due to the unauthorized use of a registered trademark without permission from the respective (**PharmaNutra S.p.A**) company.

The organisation that owns the registered brand has asked that the article be immediately removed from our website after this infringement was discovered. As a responsible publisher, we respect the need for acquiring the appropriate authorizations for the use of trademarks and copyrighted content and preserve intellectual property rights.

We deeply regret any annoyance this (**SUCROSOMIAL®**) unauthorised trademark use in the post may have brought onto the company and our readers. We take this issue seriously and have moved quickly to make things right.

The article has been taken off our website as of right away at the request of the business. We assure our readers that we are devoted to upholding the highest standards of integrity and observance of intellectual property rights and express our heartfelt sorrow for any confusion or misunderstanding that may have resulted from the unauthorised use of the trademark.

We have taken immediate action in response to the company's request by promptly removing the article from our website. We sincerely apologize for any confusion or misunderstanding caused by the unauthorized use of the trademark. Our commitment to upholding the highest standards of integrity and respecting intellectual property rights remains unwavering.

The authors and the publisher would like to apologize for any inconvenience or misunderstanding.
